

How to Select Good Location When Open a Restaurant in Manhattan

By Guangqi Chen

June 8, 2019

Location , Location and Location

Location data becomes more and more import in any business.

- Traditional approaches are time consuming and limited to small areas without seeing the whole picture.
- it is advantageous for business owners to use location data to view and know how many restaurants, where are they located?
- business owners related to food industry would be very interested in how location data to help them for competitive advantage and business values.

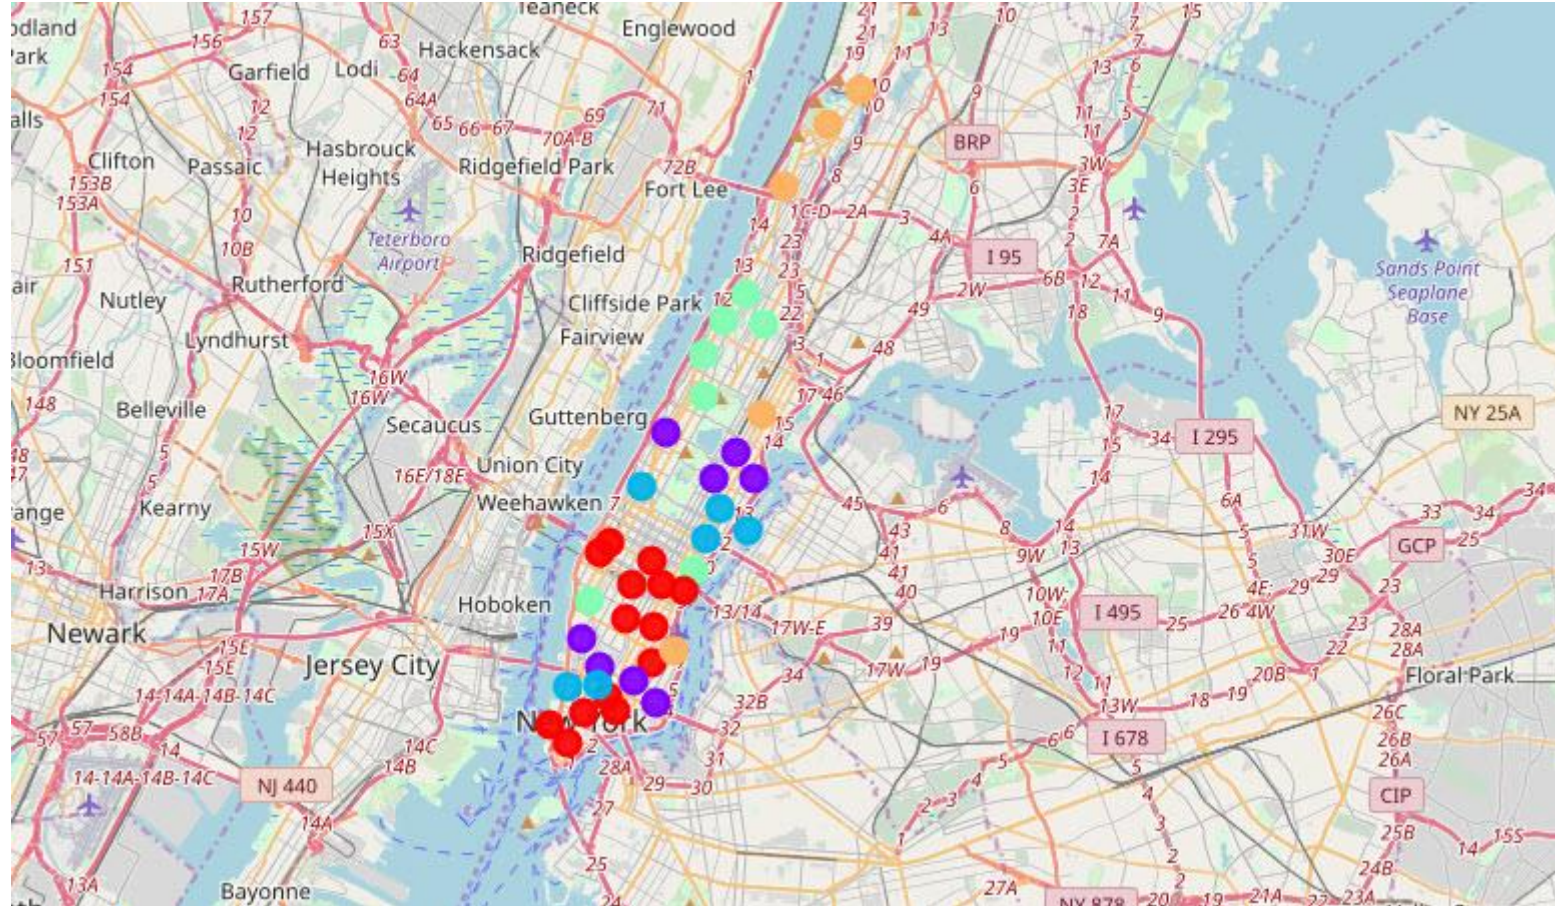

Data acquisition and cleaning

- Neighbourhood data for City of Manhattan:
https://cocl.us/new_york_dataset
